‘Curriculum’ and ‘Basic Competency’

Development and Features of the **STAR** Platform

Development of the **STAR** Platform

Launching Student Assessment (SA) and Web-based Learning and Teaching Support (WLTS) by the EDB

2003

Recommendations by the Coordinating Committee on Basic Competency Assessment and Assessment Literacy to extend and enhance the **STAR** platform:

- ❖ Covering the full curriculum in phases
- ❖ Offering a wider variety of the question types
- ❖ Providing qualitative reports on students' performance

2016

2018

2020

2024

2025

The official launch of “Student Self-selected Assessments” to all schools

Upgrading the SA to **Student Assessment Repository (STAR)** (the current platform hosted by Hong Kong Education City) with assessment items / tasks (pitched at the Basic Competency Levels) developed by the EDB

Further and continuously enhancing the current **STAR** platform with **more enhanced or newly-added functions**

The newly-launched “Student Self-selected Assessments” (Trial Version)

A Learning, Teaching and Assessment (L-T-A) platform for teachers to collect students' ongoing learning evidence, and for students to conduct self-learning

Online assessment items / tasks developed according to the learning objectives of the full curriculum

Diversified question types and computer-marked assessment items

Instant feedback / reports for teachers to understand students' learning situation and review teaching strategies and curriculum planning

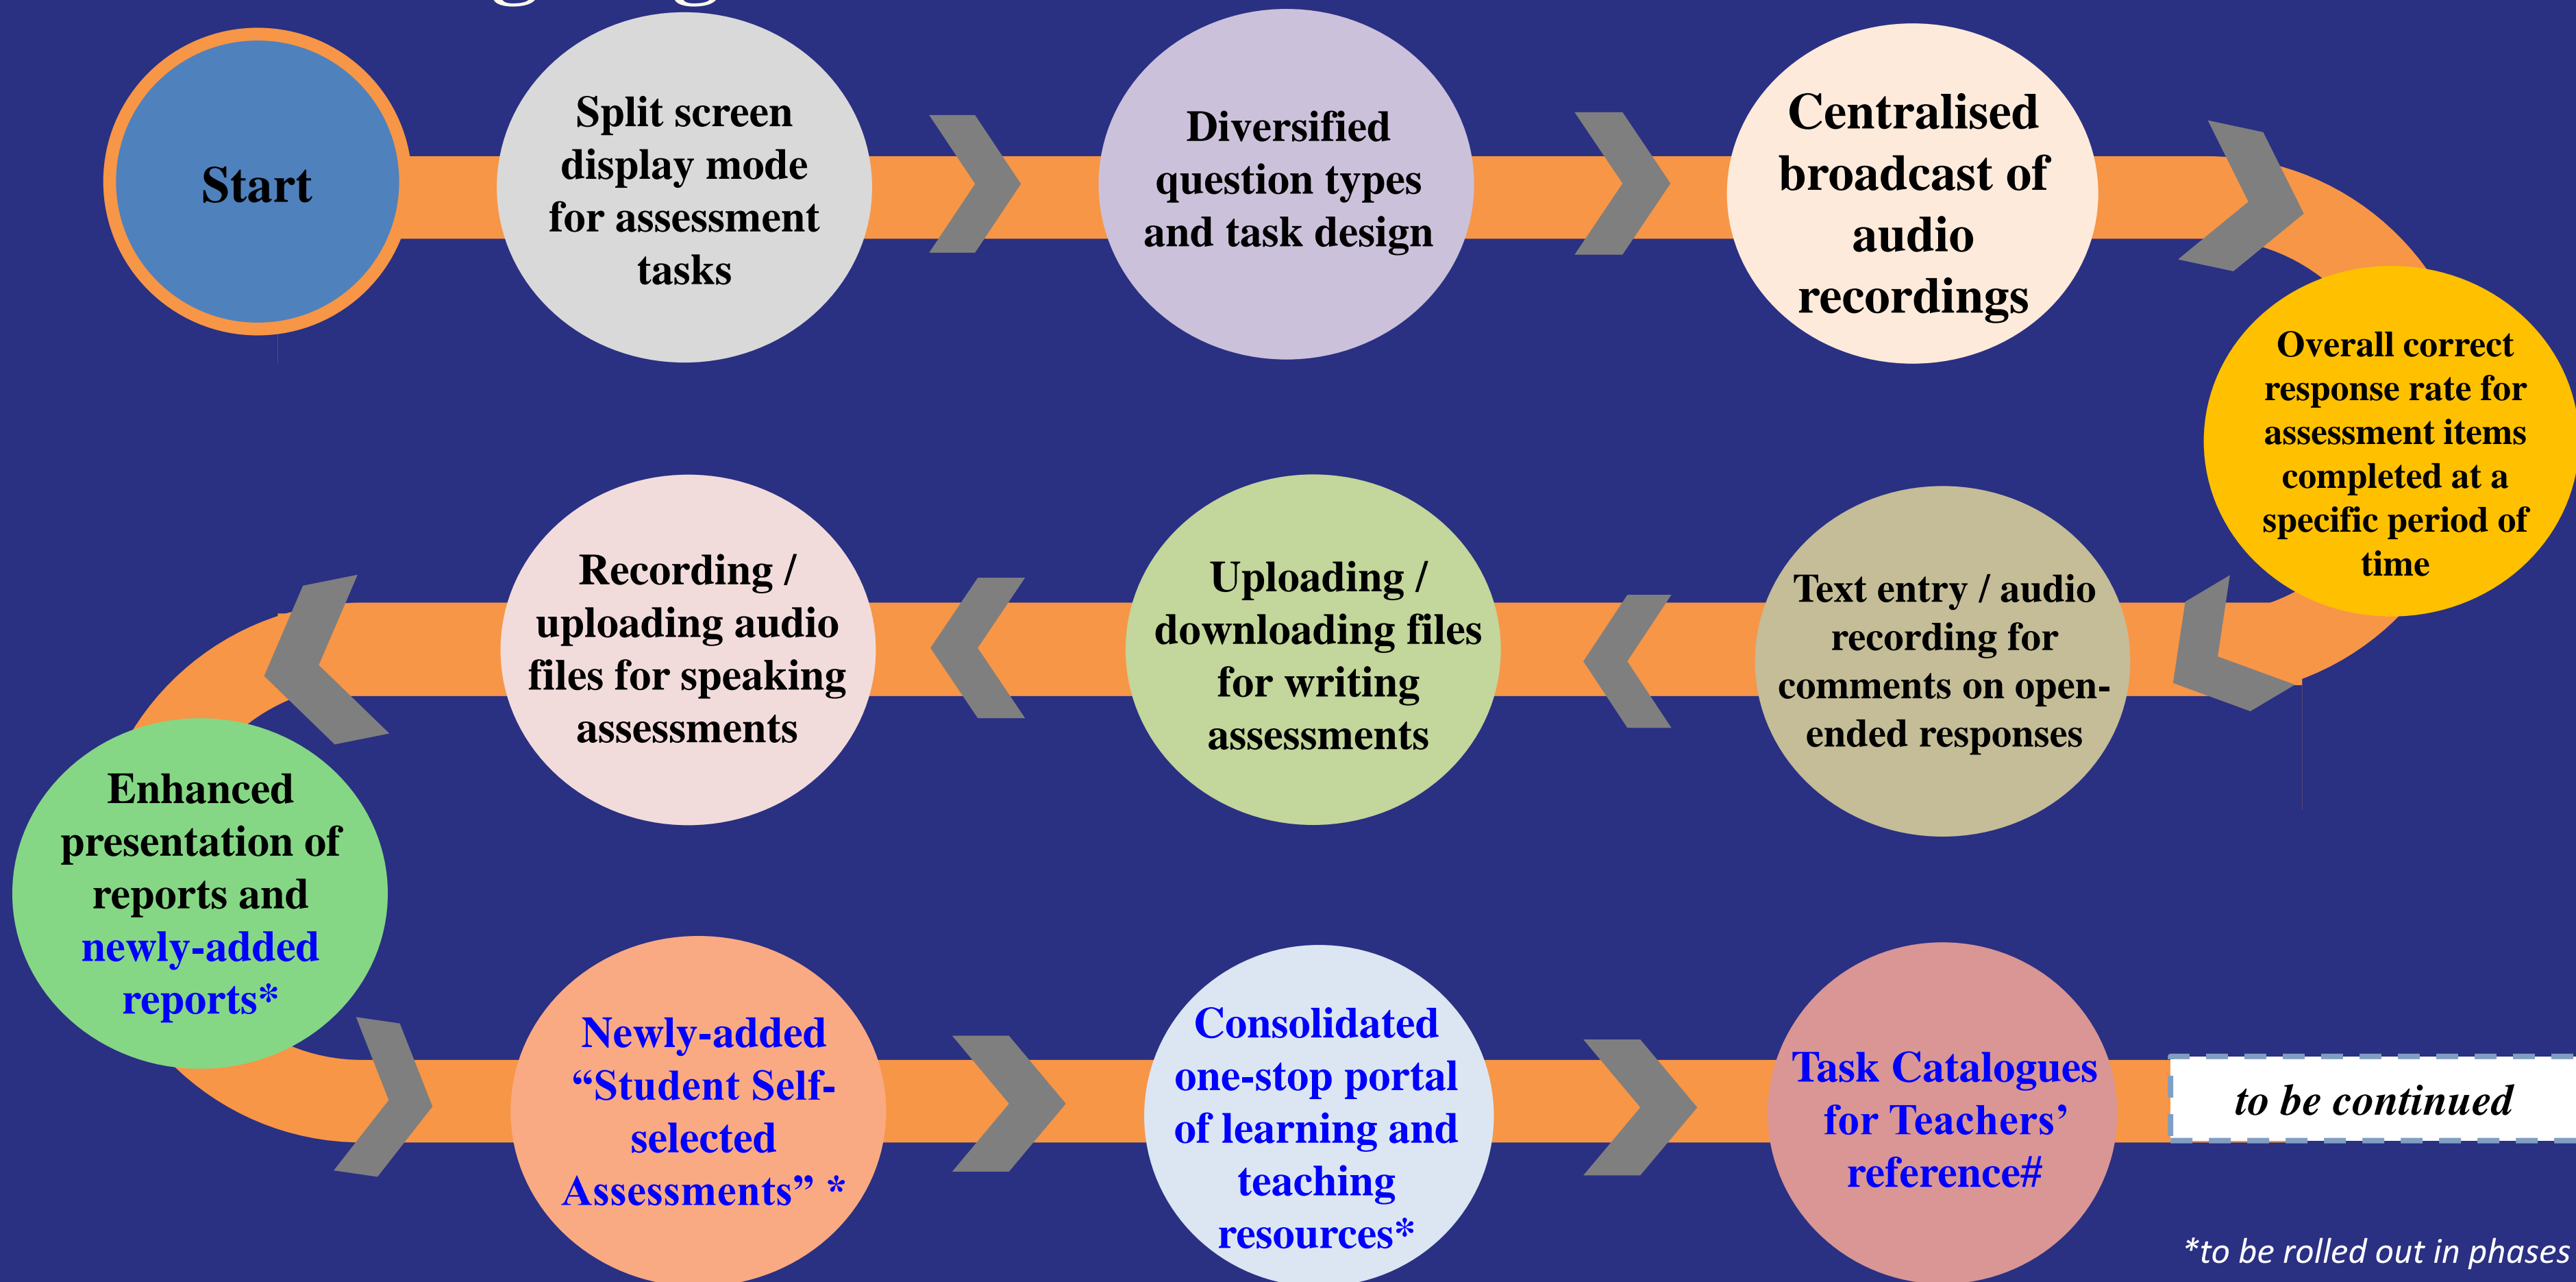

Linked to the interactive L&T resources for both teachers and students

Cater for school-based needs, as well as students' learning progress

Learning and assessment resources for students' self-learning

Individual students' learning records

Ongoing Enhancement of the **STAR** Platform

**to be rolled out in phases
coming soon*

English Language Assessment tasks on the **STAR** platform – Rationale of the Design

Features of the tasks / items

Assessing students' performance / progression along the development continuum of learning English from Primary 1 to Secondary 3 (KS1 – KS3)

Helping English Language teachers better understand and articulate students' performance and facilitate the teachers' strategical planning of remediation and progression (L&T and curriculum planning)

Making reference to the learning objectives in the curriculum guide and the learning outcomes and pointers (i.e. Attainment Milestones (ATMs)) in the Learning Progression Framework

Decoding and explaining students' performance (target language skills) with the help of annotations (diagnostic and qualitative descriptions)

Student Self-selected Assessments

Objectives and Design

of the “Student Self-selected Assessments”

Self-Directed Learning

Students can select different assessment tasks and learning resources for self-learning according to their own ability and learning interests.

Instant Feedback

Students can read their assessment reports upon the completion of assessments to identify their own strengths and weaknesses, as well as understanding more about their learning progress.

One-stop Portal of L-T-A resources

Teachers can know about students' learning progress and effectiveness of their self-selected assessments with the help of the assessment reports so as to provide timely guidance and support.

Features of the “Student Self-selected Assessments”

Flexibility

Students can select related assessment tasks **according to their own interests and learning targets.**

Instant Feedback

All close-ended questions are computer-marked and **instant results/feedback** are/is provided.

Diversity

The assessment tasks encompass **different learning strands/units** of Chinese Language, English Language and Mathematics, as well as **a variety of themes and question types.**

Linked with Interactive Learning Resources

Appropriate learning resources (e.g. animations, interactive practices) are provided for students to use **before or after assessments** so as to facilitate self-directed learning.

Amy and her dad are talking about a Christmas sale. Read what they say.

Dad:	Star Department Store is having a sale! It's opposite Super Mall. Let's go there to buy some Christmas presents.
Amy:	Yes, everything is at a good price. What will we buy for Grandpa?
Dad:	He likes hiking in the mountains. What about buying a cap for him?
Amy:	That's a good idea. But Grandpa broke his hiking stick last week. I think a new stick is more useful for him.
Dad:	OK. Let's buy him a new one . What about Grandma?
Amy:	Grandma loves cooking. She likes making cakes and puddings but she wants to learn to make some desserts. We can buy her some cookbooks.
Dad:	No, I think she'd like to have a new oven. She told me that her oven is not working. She'll be pleased with a new one. Now, what can we get for Mum? A pair of earrings? She loves fashion.
Amy:	She saw a beautiful pair of mittens in Star Department Store last week. She didn't buy them though she likes them. They were very expensive. Let's buy her a pair of mittens.

Reset

D. buying a hiking stick

3. Match the people with what they like. Choose the correct answers.

1. Grandpa: ✓

2. Grandma: ✓

3. Mum: ✓

4. Which of the following cookbooks will Grandma like most?

A. ☒

B.

STAR platform

Use of the **STAR** Platform as an Additional Assessment Tool to Promote Assessment for Learning

Assessment for Learning

What can my students do currently?

What should I expect my students to be able to do next?

How should I help my students to progress further?

What do my students need to be able to do next?

Way Forward

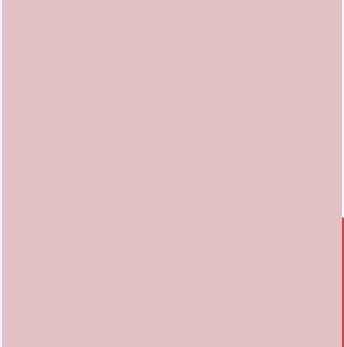

Incorporate the use of **AI tools** into the platform to enhance the functions / features of marking and providing feedback

Enrich the platform with assessment tasks of more varieties and different levels of difficulty

Consolidate and upload more L&T resources for teachers and students

Rationales and Objectives

- 
- Further enhancing the features of the STAR Platform and user experiences

- 
- Strengthening the capability of students in conducting self-directed learning by providing them with more personalised and efficient support

- 
- Facilitating teachers in the implementation of ‘Assessment for Learning’ by providing them with more systematic and comprehensive analysis of student performance

Scopes and Features of the Trial of ChatBot and AI Marking

Process

Chatbot

(applicable to language subjects and Mathematics)

- gives writing suggestions on Chinese and English writing topics
- provides guidance for answering Mathematics questions

AI-marking

(applicable to language subjects)

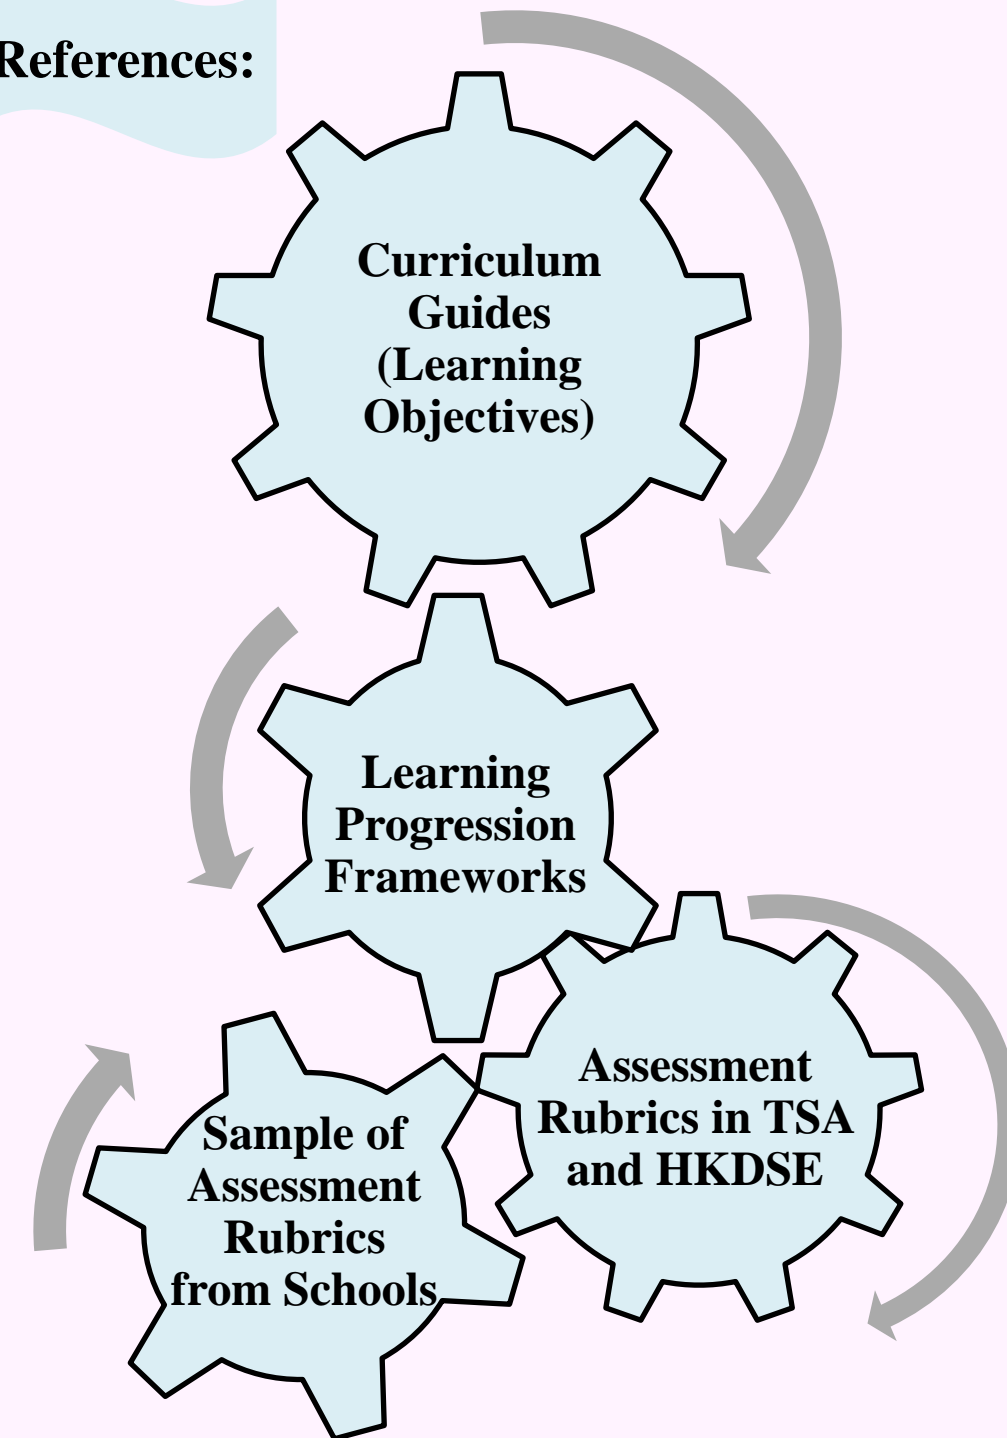

- evaluates and provides feedback according to the relevant assessment rubrics

Click the “Helper” (the chatbot) to seek help / guidance

The student can either type the text or upload the handwriting images. The student checks his / her work and makes amendments as appropriate before submission.

The submitted work is marked and feedback is provided.

Suggestions for Improvement

Incorporation of AI Tools into **STAR** (Trial) – Coming Up

- Starting from Q4 2025, interested schools will be invited to participate in the trial in phases

For interested schools, please scan the QR code and complete the form.

- Will be officially launched for use by all primary and secondary schools upon enhancement
